Occupational Health Specialists

Your Local and National Occupational Health Provider in Britain & Ireland

Occupational Health Specialists pride ourselves on providing a high quality service that's well-rounded and holistic to our clients needs.

We have a network of clinicians and specialists across the UK, so be sure we have you covered.

Most of our services can be delivered from one of our clinics or on-site, this allows our clinicians to be incorporated within your team and fully understand the working environment.

We Specialise in Network Rail PTS Medicals and Point of Contact Drug & Alcohol Testing

Our network of clinicians are ideally placed and experienced in providing 'Safety Critical Medicals' to many industries, including the rail network.

Carrying out Health screenings and Clinical Assessments inline with industry standards, this information is then uploaded promptly to 'Sentinel' to ensure compliance.

Our clinicians are also experienced in carrying out 'Drug and Alcohol' testing through immediate results to Laboratory sampling.

We also specialise in health surveillance

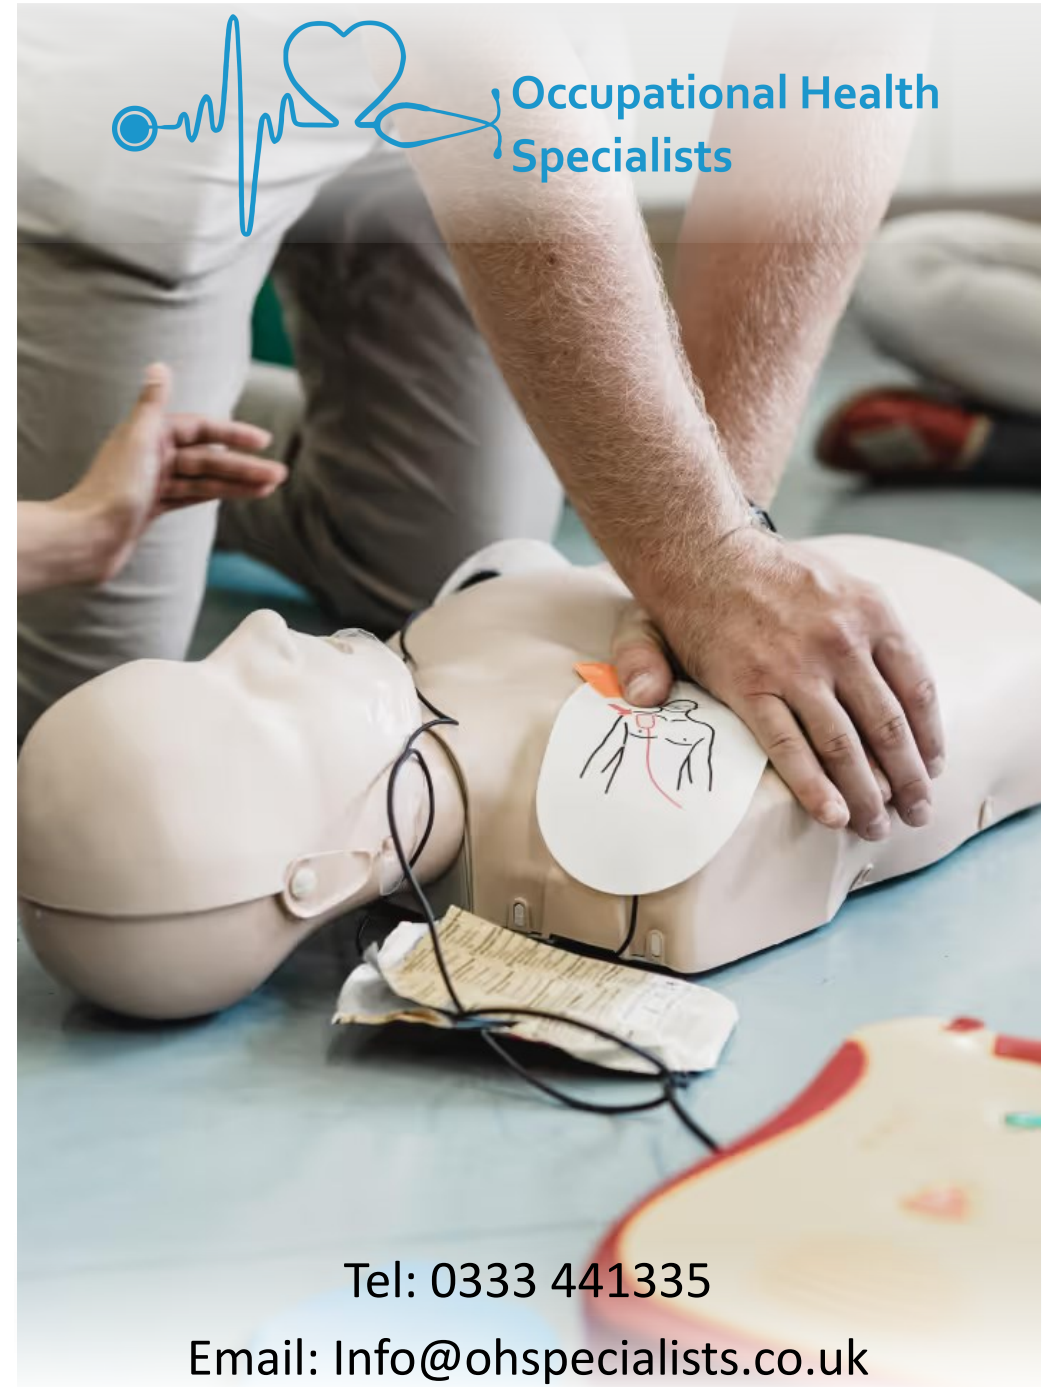

Health surveillance and monitoring is advised in many industries where certain risks and hazards exist in the workplace. This can be a daunting experience, however we can help you by completing a needs assessment specifically for your business.

Why is it important?

- Detecting ill-health effects at an early stage, so employers can introduce better controls to prevent them getting worse
- Providing data to help employers evaluate health risks
- Enabling employees to raise concerns about how work affects their health
- Highlighting lapses in workplace control measures, therefore providing invaluable feedback to the risk assessment
- Providing an opportunity to reinforce training and education of employees (e.g. on the impact of health effects and the use of protective equipment)

We provide the following training courses:

- ◆ Anaphylaxis Course
- ◆ EFAW Course (1 Day)
- ◆ First Aid Courses for GP and Dental Practices
- ◆ Healthcare Workplace Resuscitation Course
- ◆ Medical Examiner and Drug & Alcohol Collection Officer Course
- ◆ Occupational Health Technician Course (3 Day)
- ◆ Paediatric First Aid
